

Heritage Community Church was able to send 24 students and adults to Puerto Rico for a 10 day mission trip.

Our goal for this missions trip was to run a vacation Bible school in the morning and then help restore a building in the afternoon. We were able to minister to over 60 children during the week; teaching them songs, building toys, and learning about God. It was a great success.

Their church also had a dream of building two rooms to use as offices and Sunday school. We were able to clean out the area, tear and then rebuild a new roof and tear down and rebuild two walls. We were so pleased to build two new rooms for them in the time that we were there.

We were asked to participate in three of their regular church services by leading worship and then speaking. An opportunity arose where some of our students were able to go and feed the homeless of San Juan.

The lives of this church and this community will forever be changed for what we were able to do in those 10 days. This trip has also left an impact on every person who went and we are excited about what God has done in their life as much as the lives of the people of San Juan. Can't wait until next year.
